

Winston Agustin

Langkaan 1, Dasmariñas, Cavite, Philippines • winston.agustin.ih@gmail.com • 09286874227

Computer Science graduate and Backend Developer Intern with experience in full-stack web development, system administration, and cloud fundamentals. Built and deployed web applications using PHP, CodeIgniter, MySQL, and cPanel, with exposure to JavaScript, Python, Java, and C#. Skilled in backend development, database design, system integration, debugging, and deployment, with familiarity in AWS basics and Windows/Linux environments. Strong in problem-solving, adaptability, and collaboration across academic and internship projects.

EXPERIENCE

Leentech Network Solutions

Backend Developer Intern

Tanza, Cavite

Jun 2024 – Aug 2024

- Developed and deployed an e-learning platform (Startup Lab Academy) using CodeIgniter, MySQL, and cPanel
- Implemented full backend architecture, including database design and system integration
- Engineered core features such as personalized dashboards, instructor management, and administrative controls
- Debugged and tested application modules to ensure system stability and performance
- Collaborated with foreign clients for changes and suggestions
- Managed deployment processes and server configurations via cPanel

EDUCATION

Lyceum Of The Philippines University – Cavite

Bachelor of Science in Computer Science

General Trias, Cavite, Philippines

Expected Graduation: August 19, 2026

Thesis: ATLAS (Advanced Thesis Logistics and AI System) — a web-based PHP/MySQL thesis and defense management platform built for LPU-Cavite. Features a genetic-algorithm-based defense scheduler and Gemini API-powered AI evaluation support.
